

Can Crowd-Sourcing coexist with today's Data Security Regulations?

Pascal Gerig, Lorenzo Wipfli, Marcel Zauder

HUMAN-IST

October 12, 2021

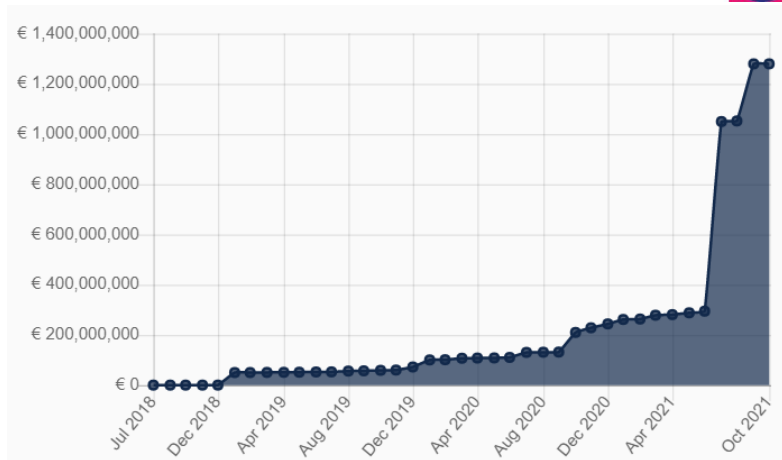

Background

- Data collection by smart cities from population

Background

- GDPR introduction in 2018
- Law enforcements impose hefty fines

Background and Motivation

Motivation

- Important to comply with new regulations (GDPR)

Research Question I

What methods do exist in order to gather information from citizen?

Research Question II

What aspects do Human Smart Cities need to consider in order to comply with GDPR?

Following the Design Science Research principles

Artifact

Design principles and guidelines for designing crowd-sourcing methods

Proceeding

- literature review
- design artifact
- descriptive artifact evaluation
