## 5.1 $k$-Anonymity and and $l$-Diversity

**5.1.a** **Define identifiers, two quasi-identifying attributes, and one sensitive attribute.**

**5.1.b** **Sanitize this data by computing a 3-anonymized version of this data by hand.**

**5.1.c** **Does it become easier or more difficult to derive a 5-anonymized data set?**

**5.1.d** **Sanitize the entries to satisfy 3-diversity.**
