11.1   Question 1

11.1.A   RFC 5598 defines five components of the Internet Mail Architecture.   In which order does a message pass through them on it's way from the sender to the receiver?

11.1.B   Which of these components form the Message Handling System?

11.1.C   Which email protocols are used in the Internet Mail Architecture? Between which components are they used?
